Historical May main run: loss first Inf at 231.22M; policy statistics NaN at 232.82M
Bottom right: synthetic fixed-body probe with initial action history +1; no physics or training
Policy means explode while weights remain finite
Reported policy mean magnitude
Collected transitions (M)
Exploration std stays nearly constant at failure
Mean std
Maximum std
Reported exploration standard deviation
Collected transitions (M)
Raw action penalty accounts for catastrophic return
Negative native episode return
Negative action penalty × 0.02 s
Magnitude in native return units
Collected transitions (M)
Same fixed weights; only action history input differs
222.58M: raw history
222.58M: bounded history
232.69M: raw history
232.69M: bounded history
Maximum absolute emitted policy mean
Synthetic network time (s)
